SCEgeo CONFERENCE

Surveying, Civil Engineering, Geoinformation in Sustainable Development

Bulletin No. 1

Voivode of
Kuyavian-Pomeranian

International
Federation of Surveyors

Marshal of
the Kujawsko-Pomorskie

President of
the Bydgoszcz City

2-4 June, 2020
Bydgoszcz, Poland

The Conference subject is the current role of surveying and geoinformation in the economy and engineering activities in the field of design, implementation, management, and monitoring buildings and structures in the aspect of sustainable development.

The conference is a continuation of scientists and practitioners cyclical meetings as well as people teaching surveying at non-surveying departments. It is focused on the exchange of scientific, didactic and practical experiences as well as the integration of the scientific community operating at the interface of surveying, cartography, spatial information systems, construction, environmental engineering, architecture, and spatial planning.

The conference is interdisciplinary and its subject area covers measurement and research, implementation and operational issues in the scope of:

- spatial information systems (design, implementation and applications) for the needs of sustainable development,
- legal and practical aspects of the investment process,
- BIM technology,
- monitoring and control systems and measurement systems in engineering issues, including:
 - new measurement systems and techniques,
 - satellite, laser and photogrammetry techniques,
 - analysis and interpretation of measurement results,
 - application of IT methods,
 - running a state geodetic and cartographic resource,
- monitoring and issues of sustainable development in engineering activities,
- communication construction (including engineering facilities) and cubature,
- network and installation.

Conference proceedings

Summaries qualified by the Scientific Committee will be published in a conference publication. Full versions of articles, after approval of the Scientific Committee and obtaining positive reviews, can be published in:

- Geosciences (special issue) - 70 p. (additional fee required),
- Reports on Geodesy and Geoinformatics - 20 p. (in English),
- Civil and Environmental Engineering Reports – 20 p. (in English),
- Geoinformatica Polonica – 20 p. (in English),
- Monograph - 20 p. (in English).

Authors are requested to indicate their preferred journal in the registration form and to prepare full versions of the articles in accordance with the requirements of those journals. The authors will be informed about the final decision of the scientific committee regarding the qualification of the article for the journal.

Deadlines

- 15.03.2020 - Sending titles and abstracts of articles
- 31.03.2020 – Abstracts acceptance
- 10.04.2020 - Participation fee (first date)
- 10.05.2020 - Participation fee (second date) and participation application

Deadlines for submitting full versions of articles will be given in subsequent communications.

Conference fee

The whole Conference: 1300 PLN (including taxes),
The whole Conference for a participant (without conference materials): 950 PLN,
Additional fee for second paper: 450 PLN.

The whole cost includes: accommodation, breakfast, lunch and dinner, conference materials and participation in accompanying events.
